

As a leading supplier of steam system solutions, Sodeco can offer a wide range of products for your steam application.

Sodeco collaborates with reliable manufacturers who have built their reputation as steam specialist based on decades of experience within the field.

STEAM TRAPS

A good steam trap makes a big difference for the efficiency of your steam application and energy management. Sodeco provides a complete range of steam traps, depending on your application:

- thermodynamic
- bimetallic
- float and thermostatic
- inverted bucket
- thermostatic

CONTROL VALVES

Steam applications can be very demanding. The selection of the right control valve is therefore very important. Our control valves offer a wide range of solutions for controlling temperature, level, pressure and humidity.

All our control valves can be supplied with electric or pneumatic actuators, including positioners, transmitters, switches and all kinds of options.

- cast steel
- stainless steel
- two- and three-way
- boiler blowdown valves
- on/off or regulation

PRESSURE REGULATORS

Pressure reducing valves are essential components for steam installations. Sodeco can offer a myriad of options, varying from the simplest direct action reducing valve to the more sophisticated pilot operated reducing valve, in different types of construction. Our flexibility allows us to offer not only a wide range of standard products, but also to provide custom-made solutions for your application.

- direct acting
- pilot operated

- cast steel
- stainless steel

- high capacity
- clean steam

SPECIAL EQUIPMENT

In order to guarantee the efficiency of a steam distribution system, several accessories are required but often neglected. Sodeco can offer strainers, sight glasses, vacuum breakers, drip traps for compressed air systems, air eliminators, condensate pumps, level gauges, humidity separators and several other ancillary items which are vital to the functioning of your installation.

- Adcamat pumps
- steam/water mixers
- humidity separators
- flash vessels
- heat exchangers
- sample coolers
- clean steam equipment
- steam injectors
